

Want to reduce your operating costs and grow your profit margins?

In a margin-focused travel business, you are almost certainly spending money you don't need to on your communications. Additionally, you'll be missing out on revenue opportunities if you don't have the right comms technology in place.

But unless you're a market expert, how do you know where you could be saving costs and boosting profits? That's where we come in.

As global sponsors of ITT, we are offering a complimentary **Communications Expenditure Review** to ITT members

This review, called Comms Expense Management, is an expert consultation, audit and analysis of your comms setup, with workshops and surveys where appropriate, designed to identify cost savings in the cloud.

During the 60-90 minute workshop session, we'll get a better understanding of your business and highlight the areas where you can improve your returns and grow your profit margins - typically leading to savings of 10-30%. This is a free of charge service, however we do charge 10% of any **achieved** savings if implemented through IP Solutions.

We'll cover:

- Telephony infrastructure and spend (including mobile and fixed line)
- Internet connectivity
- Premium rate number charges
- Compliance(ness) - PCI, GDPR
- Recommendations for best practice
- Getting the best ROI on future investment

As specialists in the travel industry, we've had success with organisations such as Park Plaza, National Geographic, Guoman, Secret Escapes and the ITT themselves.

4 Reasons Why IP Solutions

We get right under the skin of your business

We know the experience customers want

We're fanatical about sourcing the best technology

We build integrations that transform your business

" babble have become our trusted communications partner - their telecoms expense management project saved us in excess of £325,000. Everything was clearly presented to us before, during and after the project."
